

Firelogue Final Event

The Firelogue Final Event will take place on 10th and 11th of September in Berlin in a workshop format to plan the last activities until the end of the project in October 2025.

On 11th September, a below hybrid session will be organised in order to interact with the Green Deal Wildfire Risk Management Project, and broader wildfire risk management community and to discuss the projects' legacy and next steps.

Access the hybrid meeting via the following [Link](#).

11 th September 2025	
Time	Agenda Item
09:30 – 10:30	Integrated wildfire risk management (IWRM) strategy proposal & policy recommendations Presentation of the final wildfire risk management recommendations Nicolas Faivre, Research Executive Agency (REA) Claudia Berchtold, Fraunhofer Institute for Technological Trend Analysis Julie Vinders, Trilateral Research
10:30 – 11:30	Synergies with ongoing IWRM activities and potential uptake of the proposals <i>Key Notes and Round Table Discussion</i> Exchange with representatives from the policy side (DG ENV, DG AGRI, DG ECHO, FoRisk, t.b.c.) In light of the 2025 fire season, may there be leverage for the wildfire risk management project results? What can be expected in terms of a strategy uptake (and what not)? Are there any concrete plans to implement the results? Are there ongoing activities that may unfold synergies with the Green Deal wildfire risk management results?
11:30 – 12:30	Projects' legacy & Strategy uptake - Next steps and remaining research needs Interactive hybrid workshop session with online participants Organised by FhG & Nicolas Faivre What are ongoing initiatives and projects of relevance for legacy uptake? Which research needs remain and what future activities are planned?
