

“SOLUTIONS IN WILDFIRE RISK MANAGEMENT” - CALL FOR POSTERS

Do you want to share your findings with the broader wildfire research community at the Wildfire Risk Management Project Clustering 2025 in Brussels?

We welcome submissions from all researchers and particularly encourage early-career researchers, graduate students, and young professionals to present their work. We invite poster submissions showcasing work in progress, ongoing research, or completed studies that address the challenges and solutions in this critical field.

Why Participate?

- Gain Visibility – Share your research with leading experts and fellow researchers in wildfire science.
- Engage & Network – Connect with professionals, receive feedback, and spark discussions.
- Enhance Your Impact – Contribute to the evolving conversation on wildfire risk mitigation and management.

Topics of Interest

We welcome research on, but not limited to:

- Innovative approaches to wildfire risk assessment and evaluation
- Technological advancements in fire prediction and early warning systems
- Policy and governance strategies for wildfire prevention and response
- Societal and economic impacts of wildfire risks
- Community resilience and adaptation strategies

Submission Guidelines

- Abstract Length: Max. 300 words
- Deadline for Submission: 4th April 2025,
- Poster Format: DinA0 size (portrait)

Selected posters will be displayed during the WFRM Clustering Event on 20-21 May 2025 in Brussels, offering presenters the opportunity to discuss their work with experts and attendees.

Join us in advancing wildfire risk management solutions—your research could make a difference! For questions, contact: info@firelogue.eu
